FY-66 Quarterly Report No. 2

PAR 214

30 Nov 65

SUBJECT: Roller Transport Processor (12-Inch)

## TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

## DISCUSSION

2. Emulsion pick off has been noted in both the negative and in the reversal processing cycles when film Type 8430 is processed. This problem is being investigated and recommendations for correction will be made after the problem has been resolved.

3. The Operating Instructions for the Roller Transport Reversal Processor - 12-Inch (AL-45-700087- ), was transmitted to the customer on 15 Nov 65.
